

VFG-B2000 HEPA AIR SCRUBBER

Main features:

- Equipped with an extra power supply outlet.
- Industrial Grade Marking Free lockable wheels.
- Fitted with an air outlet connector with 10" inlet to connect vacuum hose.

Model	VFG-B2000
Voltage	1 phase, 120V
Power	0.8HP
Current	4.8A
Airflow Capacity	2-speed, 600/1200 CFM
Primary filter	Disposable Polyester Media
H13 filter area	140ft ²
Noise level 2 speed	58/65 dB(A)
Dimension	28"X20"X34"
Weight	84lbs

Air Scrubber

VFG-B2000 is a powerful and reliable air scrubber to handle tough air cleaning jobs in construction site. 1200CMF max airflow can be run at two speeds. The primary filter will vacuum the big size of materials before it comes to the HEPA filter. The bigger and wider H13 filter is tested and certified with efficiency >99.99% @ 0.3 microns to create super clean healthy air. Red indicator lighting warns clogged filters and orange indicator lighting warns when filters are broken or leaked. The compact and lightweight designed machine is portable that also easy to move and transport.
